Created in 2012, Geocal is a company specialising in mobile geolocation solutions. Located in New Caledonia and Vanuatu, the company offers innovative geolocation systems for fleet management of mobile units (automobiles, trucks, motorcycles, boats, etc.), mobility solutions (car-share) and driving. In addition, it advises customers in the use of these geolocation tools.

Geocal is currently the largest provider of geolocation solutions in New Caledonia with more than 500 business customers and more than 5,000 GPS beacons installed, ranging from small to medium companies with fewer than five vehicles to much larger Companies.

With a perfect control of mobile geolocation techniques, it offers solutions which adapts to the needs of each sector of activity, whether air, land or sea.

Thus, it provides customized personalized services:

- "Business" solutions
- The most modern telematic systems
- Secure Web Service platforms
- Constant Expanding software
- Technical assistance

The mission of Geocal is to enable companies to best manage the mobility of goods and people through geographic optimization solutions.

Already established in Vanuatu, the company has signed a contract for the sale and installation of GPS for a fleet of 300 vehicles with the government of Vanuatu in 2017.

With success in the New Caledonian and Vanuatu markets, Geocal will soon open a branch in French Polynesia and is currently searching for Australian markets.
